*A unique opportunity for new synergies between researchers, heritage and conservation practitioners coinciding with the Calls for **Interdisciplinary Research Grants** and **Post-doctoral Fellowships** from the AHRC/EPSRC Science and Heritage Programme*

What is Speed Dating for Research?

Speed dating for research involves researchers and heritage and conservation practitioners submitting to the Science and Heritage Programme, research questions, interests and/or ideas on which they wish to collaborate. On the day, researchers are paired with others of similar or complimentary interests to discuss their research issues on a one-to-one basis. This could then form the basis of new partnerships and collaborations. An open networking session follows at the end of the one-to-one sessions, giving attendees the opportunity for additional networking, to examine the list of research questions submitted by everyone attending on the day and to have follow-up meetings if required.

What will you get?

- Lunch
- Two 20-minute, pre-arranged one-to-one meetings with the closest match to your interests
- The opportunity to post on a notice board other questions, problems, ideas and projects
- A dossier containing all of this information (to be sent to you after the event)

Who should attend?

- Researchers or practitioners who wish to form innovative new research partnerships
- Heritage end-users seeking collaborators or partners with whom they can apply to the Science and Heritage Programme for funding
- Anyone interested in finding out more about research collaboration

The Science and Heritage Programme is funded by

To participate, please complete the enclosed speed-dating form and email it to the Programme Coordinator at debbie.williams@heritagescience.ac.uk. In completing this form you agree to have your details circulated to others speed-daters.

Please ensure that completed forms are returned by 1st April 2009 so that potential collaborators can be identified in time for the event.

There is no charge for this event.
